Fazoviy jismlarning yoyilmasi

1-test (oson) · 20 ta savol

Ism-familiya: _____ Sinf: _____ Sana: _____

Har savolda bitta to'g'ri javobni belgilang.

---

1. **Fazoviy jismni ba'zi qirralari bo'ylab kesib, yoqlarini tekislikka yoyganda hosil bo'lgan shakl nima deb ataladi?**

A) Jismning yon yog'i
B) Jismning yoyilmasi
C) Jismning qirrasi
D) Jismning asosi

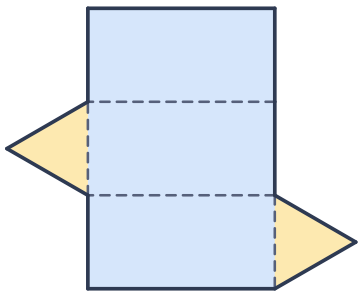

---

2. **Kubning yoyilmasi nechta kvadratdan iborat?**

A) 6 **B)** 4 **C)** 12 **D)** 8

---

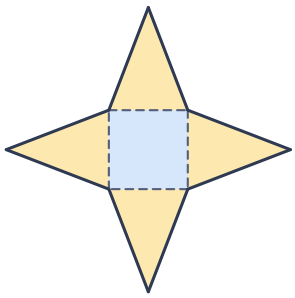

3. **Rasmdagi yoyilmadan qanday jism hosil bo'ladi?**

A) Asosi uchburchak bo'lgan piramida
B) Kuboid
C) Uchburchakli prizma
D) Asosi kvadrat bo'lgan piramida

---

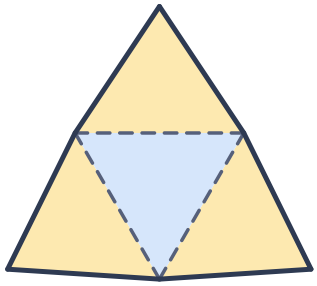

4. **Rasmdagi yoyilmadan qanday jism hosil bo'ladi?**

A) Asosi kvadrat bo'lgan piramida
B) Kub
C) Asosi uchburchak bo'lgan piramida
D) Uchburchakli prizma

---

5. **Rasmdagi yoyilma buklansa, hosil bo'lgan jismning nechta yog'i bo'ladi?**

A) 3 **B)** 4
C) 5 **D)** 6

---

6. **Uchburchakli prizmaning yoyilmasida nechta uchburchak va nechta to'g'ri to'rtburchak bor?**

A) 2 ta uchburchak, 3 ta to'g'ri to'rtburchak
B) 1 ta uchburchak, 3 ta to'g'ri to'rtburchak
C) 2 ta uchburchak, 4 ta to'g'ri to'rtburchak
D) 3 ta uchburchak, 2 ta to'g'ri to'rtburchak

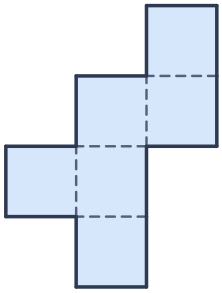

---

7. **Asosi kvadrat bo'lgan piramidaning yoyilmasida nechta uchburchak bor?**

A) 4 **B)** 5 **C)** 8 **D)** 3

---

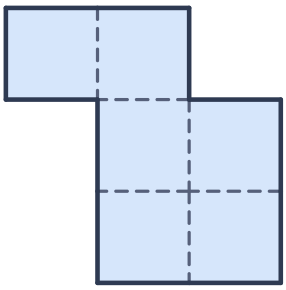

8. **Rasmdagi shakl kubning yoyilmasimi?**

A) Yo'q — kvadratlar bitta qatorda emas
B) Yo'q — ikki kvadrat bitta yoqqa tushadi
C) Ha
D) Yo'q — kvadratlar 6 ta emas

---

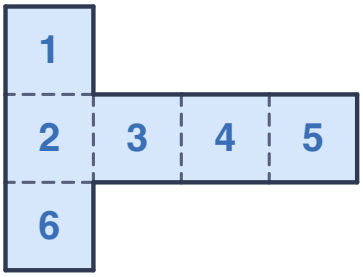

9. **Rasmdagi shakl kubning yoyilmasimi?**

A) Yo'q — kvadratlar teng emas
B) Yo'q — kvadratlar 6 ta emas
C) Ha
D) Yo'q — ikki kvadrat bitta yoqqa tushadi

---

10. **Rasmdagi yoyilmadan kub yasaldi. 2-yoq qarshisida qaysi yoq turadi?**

A) 6-yoq
B) 3-yoq
C) 4-yoq
D) 5-yoq

---

11. **Kuboidning bo'yi 5 cm, eni 3 cm, balandligi 2 cm. Uning yoyilmasida 5 cm × 3 cm o'lchamli nechta to'g'ri to'rtburchak bor?**

A) 1
B) 2
C) 3
D) 6

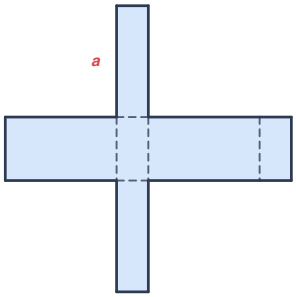

---

12. **Fazoviy jism yoyilmasini buklasak, nima hosil bo'ladi?**

A) Bitta kesma
B) Doira
C) Fazoviy jism
D) Tekis ko'pburchak

---

13. **Kuboidning bo'yi 7 cm, eni 4 cm, balandligi 2 cm. Rasmdagi yoyilmada a kesma necha cm?**

A) 4 cm
B) 7 cm
C) 2 cm
D) 9 cm

---

14. **Kub uchun «yoqlari soni + uchlari soni − qirralari soni» nechaga teng?**

A) 2
B) 4
C) 26
D) 0

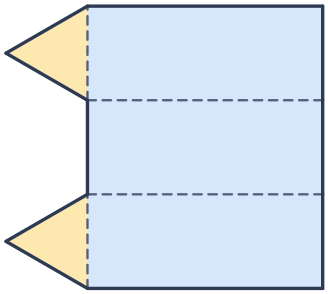

---

15. **Uchburchakli prizmaning nechta qirrasi bor?**

A) 9
B) 12
C) 5
D) 6

---

16. Nima uchun rasmdagi shakl uchburchakli prizmaning yoyilmasi emas?

A) Uchburchaklar teng emas

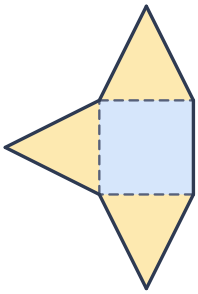

B) Ikkala uchburchak bir uchda, ikkinchi uch ochiq qoladi

C) Uchburchaklar soni kam

D) To'g'ri to'rtburchaklar 3 ta emas

---

17. Rasmdagi shaklni asosi kvadrat bo'lgan piramidaning yoyilmasiga aylantirish uchun nima qilish kerak?

A) Kvadratning bo'sh tomoniga yana bitta uchburchak qo'shish

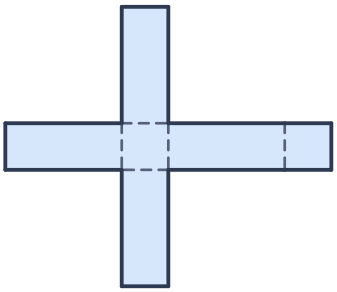

B) Yana bitta kvadrat qo'shish

C) Bitta uchburchakni olib tashlash

D) Kvadrat o'rniga uchburchak qo'yish

---

18. Rasmdagi yoyilmadan qanday jism hosil bo'ladi?

A) Kub

B) Uchburchakli prizma

C) Asosi kvadrat bo'lgan piramida

D) Kuboid

---

19. Kub yoyilmasida 4 ta kvadrat bitta qatorda turibdi. Qolgan 2 ta kvadrat qayerda bo'lishi kerak?

A) Qatorning turli tomonida: biri tepada, biri pastda

B) Ikkalasi qatorning tepasida

C) Qatorning davomida

D) Ikkalasi bitta kvadratning ustida

---

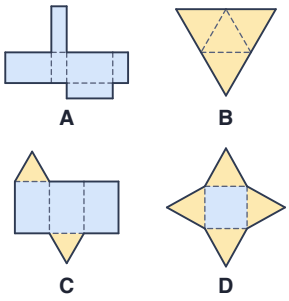

20. Qaysi biri uchburchakli prizmaning yoyilmasi?

A) C

B) A

C) B

D) D

Javoblar

Fazoviy jismlarning yoyilmasi · 1-test (oson)

№	Javob	Qiymati
1	**B**	Jismning yoyilmasi
2	**A**	6
3	**C**	Uchburchakli prizma
4	**A**	Asosi kvadrat bo'lgan piramida
5	**B**	4
6	**A**	2 ta uchburchak, 3 ta to'g'ri to'rtburchak
7	**A**	4
8	**C**	Ha
9	**D**	Yo'q — ikki kvadrat bitta yoqqa tushadi
10	**C**	4-yoq

№	Javob	Qiymati
11	**B**	2
12	**C**	Fazoviy jism
13	**B**	7 cm
14	**A**	2
15	**A**	9
16	**B**	Ikkala uchburchak bir uchda, ikkinchi uch ochiq qoladi
17	**A**	Kvadratning bo'sh tomoniga yana bitta uchburchak qo'shish
18	**D**	Kuboid
19	**A**	Qatorning turli tomonida: biri tepada, biri pastda
20	**A**	C

Qisqa yechimlar

1. Jism qirralari bo'ylab kesilib, tekislikka yoyiladi.
Hosil bo'lgan tekis shakl — jismning **yoyilmasi**.

---

2. Kubning 6 ta yog'i bor, hammasi teng kvadratlar.
Yoyilmada ham **6** ta kvadrat bo'ladi. (12 — kubning qirralari soni.)

---

3. Yoyilmada 3 ta to'g'ri to'rtburchak va 2 ta teng uchburchak bor.
To'rtburchaklar yon yoqlar, uchburchaklar — ikki asos.
Bu — **uchburchakli prizma**.

---

4. O'rtada 1 ta kvadrat — asos. Uning har tomonida bittadan uchburchak — 4 ta yon yoq.
Buklasak, uchburchaklarning uchlari bitta nuqtada uchrashadi.
Bu — **asosi kvadrat bo'lgan piramida**.

---

5. Yoyilmadagi har bir shakl — jismning bitta yog'i.
Shakllar: o'rtadagi uchburchak (asos) va 3 ta yon uchburchak.
Jami **4** ta yoq.

---

6. Uchburchakli prizmaning 2 ta asosi — teng uchburchaklar.
Asosning har tomoniga bitta yon yoq to'g'ri keladi: 3 ta to'g'ri to'rtburchak.
Javob: **2 ta uchburchak, 3 ta to'g'ri to'rtburchak**.

---

7. Kvadratning 4 ta tomoni bor. Har bir tomoniga bitta yon yoq — uchburchak to'g'ri keladi.
Javob: **4** ta uchburchak (yana 1 ta kvadrat — asos).

---

8. Kvadratlar 6 ta. Ustundagi uchta kvadratning o'rtasini tub deymiz: uning tepasidagi — orqa, pastidagi — old devor.
Yuqoridagi ikki kvadrat: biri o'ng devor, eng tepadagisi — qopqoq. Pastki chapdagi — chap devor.
Har kvadrat alohida yoqqa tushdi: **ha**, kub yoyilmasi.

---

9. Kvadratlar 6 ta, lekin pastki o'ngdagi 4 tasi «deraza» (2 × 2) bo'lib turibdi.
Bunday to'rtta kvadratni buklasak, ikkitasi bitta yoqqa tushadi.
Javob: **yo'q — ikki kvadrat bitta yoqqa tushadi**.

---

10. 2, 3, 4 kvadratlar bir qatorda ketma-ket turibdi.
Ketma-ket uchta kvadratning chetdagilari qarama-qarshi yoqlar bo'ladi.
Javob: **4-yoq**.

---

11. Kuboidning qarama-qarshi yoqlari teng.
5 cm × 3 cm — ostki va ustki yoq.
Javob: **2** ta.

---

12. Yoyilma jismni kesib ochishdan hosil bo'ladi.
Uni qayta buklasak, **fazoviy jism** hosil bo'ladi.

---

13. a — tepadagi tor yoqning uzun tomoni.
Bu yoq kuboidning old (orqa) yog'i: bo'yi × balandligi = 7 × 2.
Uzun tomoni — bo'yi: **7 cm**.

---

14. Kubning 6 ta yog'i, 8 ta uchi, 12 ta qirrasi bor.
6 + 8 − 12 = **2**.

---

15. Har bir asosda (uchburchakda) 3 tadan qirra: 3 + 3 = 6.
Asoslarni tutashtiruvchi yana 3 ta qirra bor.
6 + 3 = **9**.

---

16. Uchta to'g'ri to'rtburchak buklanib, «quvur» bo'ladi. Uning ikki uchini uchburchaklar yopishi kerak.
Rasmda ikkala uchburchak chap tomonda turibdi.
Javob: **ikkala uchburchak bir uchda, ikkinchi uch ochiq qoladi**.

---

17. Asosi kvadrat bo'lgan piramidaning 4 ta yon yog'i bor. Rasmda faqat 3 ta uchburchak.
Kvadratning o'ng tomoni bo'sh.
Javob: **bo'sh tomoniga yana bitta uchburchak qo'shish**.

---

18. Yoyilmada 2 ta kichik kvadrat va 4 ta teng uzun to'g'ri to'rtburchak bor.
Kubda 6 ta yoqning hammasi teng kvadrat bo'lardi.
Bu — **kuboid** (ikki yog'i kvadrat bo'lgan uzun quti).

---

19. Qatordagi 4 ta kvadrat tub, devor, qopqoq, devor bo'lib aylanadi.
Qolgan ikkitasi — old va orqa devor. Ular qatorning ikki tomonida bo'lishi kerak.
Ikkalasi bir tomonda bo'lsa, bitta yoqqa tushadi.
Javob: **turli tomonida**.

---

20. A — 6 ta to'g'ri to'rtburchak: kuboid. B — 4 ta uchburchak: piramida.
C — 2 ta uchburchak va 3 ta to'g'ri to'rtburchak: **prizma**.
D — kvadrat va 4 ta uchburchak: piramida.
