To'rtburchaklarni chizish

1-test (oson) · 20 ta savol

Ism-familiya: _____ Sinf: _____ Sana: _____

Har savolda bitta to'g'ri javobni belgilang.

---

1. **Birinchi qadamda nima chizildi?**

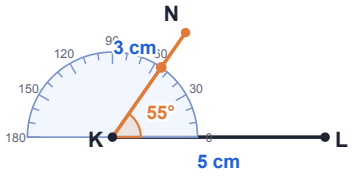

A) Parallel chiziq
B) 5 cm li KL kesma
C) 55° li burchak
D) Romb

2. **Parallelogrammni chizish uchun nimalar berilishi kerak?**

A) Ikki qo'shni tomon va ular orasidagi burchak
B) Faqat bitta tomon
C) Faqat ikki burchak
D) To'rtala burchak

3. **Bu qadamda nima qilindi?**

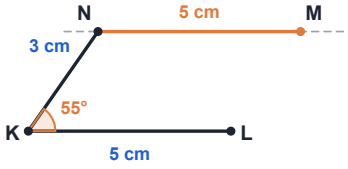

A) L va M tutashtirildi
B) Parallel kesma chizildi
C) Shakl bo'yaldi
D) K uchida burchak qurilib, ikkinchi tomon o'lchandi

4. **Berilgan kesmaga parallel kesma qaysi asboblar bilan chiziladi?**

A) Faqat transportir
B) Chizg'ich va uchburchakli chizg'ich
C) Faqat qalam
D) Sirkul

5. **NM kesma qanday chizilmoqda?**

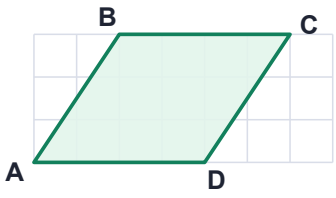

A) KL ga parallel va unga teng
B) KN ga teng
C) Ixtiyoriy uzunlikda
D) KL ga perpendikulyar

6. **Rombni parallelogramm kabi chizganda ikkinchi tomon qanday olinadi?**

A) Birinchi tomonga teng
B) Birinchisidan qisqaroq
C) Ixtiyoriy
D) Birinchisidan uzunroq

7. **Katakli daftarda qanday shakl chizilgan?**

A) Kvadrat
B) Uchburchak
C) Parallelogramm
D) Trapetsiya

---

8. **Trapetsiyaning asoslari qanday chiziladi?**

A) Kesishadigan qilib

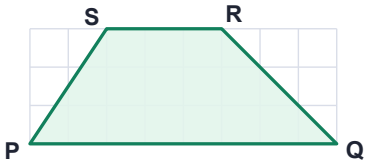

B) Parallel, lekin har xil uzunlikda

C) Parallel va teng

D) Perpendikulyar

---

9. **Trapetsiyaning qaysi tomonlari parallel?**

A) PS va SR

B) PQ va QR

C) PQ va SR

D) PS va QR

---

10. **Xomaki nusxa nima uchun kerak?**

A) Qaysi kesmadan boshlash va burchaklar qayerda ekanini ko'rish uchun

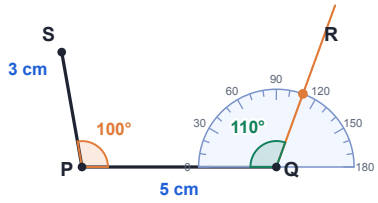

B) Aniq o'lchash uchun

C) Uni o'qituvchiga topshirish uchun

D) Shaklni bo'yash uchun

---

11. **Q uchida nima chizildi?**

A) Yon tomon 3 cm

B) 110° li nur

C) 70° li nur

D) Asosga parallel kesma

---

12. **Parallelogrammda KL = 6 cm. NM tomon necha cm chiziladi?**

A) 3 cm

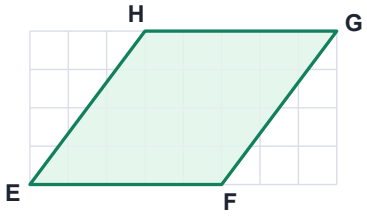

B) Ixtiyoriy

C) 6 cm

D) 12 cm

---

13. **Katakli daftarda qanday shakl chizilgan?**

A) Trapetsiya

B) Kvadrat

C) To'g'ri to'rtburchak

D) Romb

---

14. **Parallelogramm chizildi: ∠K = 55°. ∠L ni alohida qurish kerakmi?**

A) Yo'q, u o'zi 125° bo'lib chiqadi

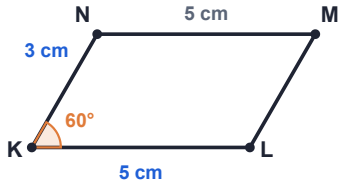

B) Ha, 55° qurish kerak

C) Ha, 90° qurish kerak

D) Yo'q, u 55° bo'lib chiqadi

---

15. **Chizmadagi parallelogrammda LM tomon necha cm?**

A) 2 cm

B) 8 cm

C) 3 cm

D) 5 cm

---

16. Trapetsiya chizishda to'rtinchi uch qanday topiladi?

A) Asosga parallel chiziq va ikkinchi burchak nuri kesishgan joyda

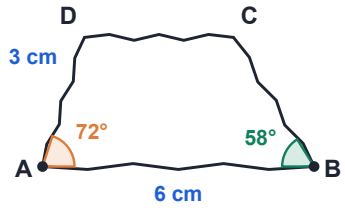

B) Transportir markazida

C) Ixtiyoriy joyda

D) Asos uzunligini qayta o'lchab

---

17. Bu qanday chizma?

A) Aniq chizma

B) Transportir rasmi

C) Xomaki nusxa

D) Katakli daftardagi chizma

---

18. Rombni chizish uchun qaysi ma'lumot yetarli?

A) Faqat burchak

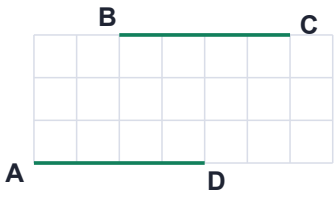

B) Ikki burchak

C) Faqat tomon

D) Tomon va bitta burchak

---

19. Keyingi qadamda nima qilinadi?

A) A va B, D va C tutashtiriladi

B) Burchak o'lchanadi

C) Yana bir parallel kesma chiziladi

D) Kesmalar o'chiriladi

---

20. Chizg'ich bilan 7 cm li kesma chizish uchun qaysi belgilar orasini olamiz?

A) 0 dan 7 gacha

B) 7 dan 14 gacha

C) 1 dan 8 gacha

D) 1 dan 7 gacha

Javoblar

To'rtburchaklarni chizish · 1-test (oson)

№	Javob	Qiymati
1	**B**	5 cm li KL kesma
2	**A**	Ikki qo'shni tomon va ular orasidagi burchak
3	**D**	K uchida burchak qurilib, ikkinchi tomon o'lchandi
4	**B**	Chizg'ich va uchburchakli chizg'ich
5	**A**	KL ga parallel va unga teng
6	**A**	Birinchi tomonga teng
7	**C**	Parallelogramm
8	**B**	Parallel, lekin har xil uzunlikda
9	**C**	PQ va SR
10	**A**	Qaysi kesmadan boshlash va burchaklar qayerda ekanini ko'rish uchun

№	Javob	Qiymati
11	**B**	110° li nur
12	**C**	6 cm
13	**D**	Romb
14	**A**	Yo'q, u o'zi 125° bo'lib chiqadi
15	**C**	3 cm
16	**A**	Asosga parallel chiziq va ikkinchi burchak nuri kesishgan joyda
17	**C**	Xomaki nusxa
18	**D**	Tomon va bitta burchak
19	**A**	A va B, D va C tutashtiriladi
20	**A**	0 dan 7 gacha

Qisqa yechimlar

1. Har doim avval berilgan tomon — **kesma** chiziladi.

2. Ikki qo'shni tomon va ular orasidagi burchak berilsa, qolgan tomonlar **parallel va teng** qilib chiziladi.

3. Transportir K da turibdi: 55° quriladi va nur bo'ylab 3 cm o'lchanadi — **2-qadam**.

4. Uchburchakli chizg'ichni **chizg'ich bo'ylab surib** parallel chiziq o'tkaziladi.

5. Parallelogrammda qarama-qarshi tomonlar **parallel va teng**: $NM \parallel KL$, NM = KL = 5 cm.

6. Rombning **4 ta tomoni teng**, shuning uchun ikkinchi tomon ham shuncha.

7. AD va BC — teng va parallel (ikkalasi 4 katak), AB va DC ham parallel — **parallelogramm**.

8. Asoslar **parallel**; teng bo'lsa, shakl parallelogramm bo'lib qoladi.

9. PQ va SR ikkalasi ham kataklar bo'ylab yotiq — **parallel**; PS va QR esa parallel emas.

10. Xomaki nusxa — **reja**: o'lchamlar joyiga yoziladi, keyin aniq chiziladi.

11. Transportir Q da: ikkinchi berilgan burchak — **110°** li nur chizildi.

12. Qarama-qarshi tomonlar teng: NM = KL = **6 cm**.

13. EF — 5 katak; EH — 3 o'ngga va 4 tepaga, uzunligi ham 5. To'rtala tomon teng va qiya — **romb**.

14. Parallel tomonlar chizilsa, ∠L = 180° − 55° = **125°** o'zi hosil bo'ladi.

15. LM — KN ga qarama-qarshi: LM = KN = **3 cm**.

16. Yon tomon uchidan asosga **parallel** chiziq o'tkaziladi, u nur bilan kesishgan joy — to'rtinchi uch.

17. Chiziqlar qo'lda chamalab chizilgan, o'lchamlar yozilgan — **xomaki nusxa**.

18. Romb tomonlari teng — bitta **tomon** va bitta **burchak** yetarli.

19. AD va BC teng va parallel — uchlarini **tutashtirsak**, parallelogramm hosil bo'ladi.

20. O'lchash **0** belgisidan boshlanadi.
