Qisqa yechimlar

1. ∠B o'zi kelib chiqadi: 180° − 40° = 140°. Chizish uchun **∠B kerak emas**.

2. ∠B = 45° bo'lgani uchun B dan tushgan qism balandlikka teng — 3 cm. DC = 6 − 3 = **3 cm**.

3. 100° + 80° = 180° — ikkinchi yon tomon ham parallel bo'lib qoladi: **parallelogramm**.

4. TUW uchburchak: ikki tomoni 4 cm, orasida 60° — teng tomonli. Qisqa diagonal ham **4 cm**.

5. 30 : 5 = **6 cm**.

6. $AD \parallel BC$ va AD = BC: B dan C ga 2 o'ngga va 3 tepaga borilgan — A dan ham **2 o'ngga, 3 tepaga**.

7. 180° − 65° = **115°**.

8. To'rtinchi uch — **parallel chiziq va nur kesishgan** nuqta.

9. Qarama-qarshi burchaklar teng: ∠C = **48°**.

10. PS — 2 o'ngga, 3 tepaga; QR — 2 chapga, 3 tepaga. Uzunliklari **teng**.

11. 45° li burchak tomonidagi qism balandlikka teng — 3 cm. DC = 7 − 3 = **4 cm**.

12. Romb — parallelogramm: W dan TU ga **parallel va teng** (4 cm) kesma chiziladi.

13. Diagonal rombni ikkita teng tomonli uchburchakka bo'ladi — **5 cm**.

14. EF va HG parallel, lekin uzunliklari har xil (6 va 2 katak) — **trapetsiya**.

15. 12 : 2 = **6 cm**.

16. Yozilgan: AB, AD, ∠A, ∠B. **DC** berilmagan — u chizilganda o'zi hosil bo'ladi.

17. Avval **kesma**, keyin **burchak va ikkinchi tomon**, so'ng **parallel kesma** va oxirida **tutashtirish**.

18. ∠X va ∠Y bitta XY tomonga yopishgan: 180° − 70° = **110°**.

19. Kvadratning burchaklari doim 90°, tomonlari teng — **tomoni** yetarli.

20. Bitta burchak 90° bo'lsa, hammasi 90° — **to'g'ri to'rtburchak**.
