Qisqa yechimlar

1. Uchburchak — **3 ta uch**, ularni tutashtiruvchi **3 ta tomon** va **3 ta burchak**.

2. QF qarshisidagi uch — J.
J dan chiqqan ikki kesmadan faqat JH QF bilan to'g'ri burchak hosil qiladi: **JH**. Asos qiya bo'lsa ham, balandlik unga perpendikulyar bo'ladi.

3. Asos sifatida **istalgan tomon** olinishi mumkin; har bir asosga o'z balandligi bor.

4. Balandlik asos (yoki uning davomi) bilan **to'g'ri burchak** hosil qiladi — u asosga perpendikulyar.

5. SK kesma S uchdan chiqqan.
S qarshisidagi tomon — DY, va SK ⊥ DY. Asos — **DY**.

6. Har bir tomon asos bo'la oladi va har biriga bitta balandlik: **3 ta**.

7. ZO qarshisidagi uch — T.
TO tomon ZO ga perpendikulyar (O burchak to'g'ri), shuning uchun balandlik — **TO** tomonning o'zi.

8. Bo'yi 7 cm, eni 3 cm.
Yuz = bo'yi × eni = 7 · 3 = **21 cm²**. (10 — tomonlar yig'indisi.)

9. Yuz = bo'yi × eni.
9 · 6 = **54 cm²**. (15 — tomonlar yig'indisi, yuz emas.)

10. BL to'g'ri to'rtburchakni ikki bo'lakka bo'ladi: BDL va BTL.
D va T burchaklar to'g'ri, shuning uchun ikkalasi — **to'g'ri burchakli uchburchak**.

11. Balandlik K dan MO ga tik tushadi.
K uchi MO dan 3 katak yuqorida: **3 cm**. (8 cm — asos.)

12. Kvadratning yuzi = tomoni × tomoni.
12 · 12 = **144 cm²**.

13. Balandlik — **asos qarshisidagi uchdan** asosga (yoki davomiga) tushirilgan perpendikulyar.

14. Perpendikulyarlik belgisi — ⊥. Masalan, KL ⊥ LM.

15. G burchak o'tmas, VH CG ning davomiga tushgan.
VH tik kesma: V asos chizig'idan 3 katak yuqorida — **3 cm**. (2 cm — G dan H gacha.)

16. Balandlik asos qarshisidagi uchdan tushiriladi. V qarshisidagi tomon — **DL**; balandlik unga (yoki uning davomiga) perpendikulyar.

---

17. O'tkir burchakli uchburchakning **uchala** burchagi o'tkir. Bitta burchagi to'g'ri bo'lsa — to'g'ri burchakli, o'tmas bo'lsa — o'tmas burchakli.

---

18. To'g'ri to'rtburchakning uzun tomoni — **bo'yi**, qisqa tomoni — eni.

---

19. To'g'ri burchak burchak uchida **kichik kvadratcha** bilan belgilanadi.

---

20. Kvadrat: $5 \cdot 5 = 25$ cm².
To'g'ri to'rtburchak: $8 \cdot 3 = 24$ cm².
$25 > 24$ — **kvadratniki** katta.
